

RELIANCE MEDICAL GROUP

RELIANCE MEDICAL GROUP has provided Ob/Gyn, Pediatric and Family Practice services for over 20 years to patients in Atlantic County, New Jersey. Dedicated to the principle that "Quality Care is a Right, Not a Privilege." Reliance's founder and President, JON M. REGIS, M.D., ensures that high quality medical services are offered to all patients.

Since its start, Reliance has become one of the largest multi-specialty primary care physician practices in Atlantic County, performing over 450 deliveries and 40,000 patient office visits in Ob/Gyn, Pediatrics and Family Medicine.

As a result of its dedication to service, Reliance was named as one of the top 7 multi-specialty providers in the State of New Jersey and received an award from Horizon Blue Cross/Blue Shield of New Jersey in the recognition of its outstanding commitment to high quality healthcare.

What Does All of This Mean to You and Your Family?

Reliance has the experience and commitment to consistently render the quality of care that you and your family expect and demand from a physician group. Reliance's daily patient care is delivered with respect and dignity by our group's compassionate and experienced physicians and office staff members (nurses, medical assistants, front staff, etc.).

Reliance employs trained, skilled and certified staff and our offices are newly decorated and have up-to-date equipment.

Reliance is also actively involved in various community projects, such as local health fairs where Reliance performs preventative and wellness services.

Additionally Reliance has performed health education seminars and provided consulting services. Recently, Reliance sponsored and developed "What's Up Doc," a community health-education television program that presents pertinent information on healthcare topics to parents and school-aged children in the area.

Reliance is proud of its quality services and our talented staff members who are devoted to our health and well-being.

So, let "our family" provide "your family" with the following healthcare needs:
